PROFESSIONAL SUMMARY

Results-driven Full Stack Web Developer with strong proficiency in JavaScript, Express.js, Node.js, MongoDB, and adept at using Generative AI to quickly adapt to new technologies. Expertise in collaborative development with focus on seamless integration, efficient problem-solving, and robust web application design.

PROJECTS

1. Health-Booster (Health Supplement E-commerce Website Clone) | [🌐](#) | [🔗](#)

HTML5 | CSS3 | JavaScript | Express.js | Node.js | MongoDB

- Developed the backend using Node.js and Express.js, ensuring robust server-side API functionality and integration with MongoDB.
- Designed and implemented RESTful APIs for seamless communication between frontend and backend components, enhancing user experience.
- Managed user authentication, authorization, and session handling for secure and efficient user management.
- Integrated dynamic filtering functionality on product pages, improving user navigation and product search capabilities.
- Assisted in building and styling the frontend UI using HTML, CSS, and JavaScript, ensuring responsive and visually appealing design.

2. Mind-Board (White Board Application) | [🌐](#) | [🔗](#)

HTML5 | CSS3 | JavaScript | Firebase

- Collaborated with team members to transform project requirements into a functional interactive whiteboard application.
- Developed customizable drawing tools and integrated shape and text features to enhance user interactivity.
- Implemented dark mode support and canvas locking features, improving user experience and application functionality.
- Utilized Firebase for authentication, enabling secure sign-up and login processes for users.
- Participated in thorough testing and debugging to ensure application reliability and stability.

3. MoveSmart (Traffic Relief Dashboard) | [🌐](#) | [🔗](#)

HTML5 | CSS3 | JavaScript | Firebase

- Developed a secure login/signup system for user authentication, ensuring access to personalized services.
- Implemented a dedicated page for users to order essentials during traffic congestion, enhancing user convenience.
- Designed and developed an option for booking bicycles or scooters to facilitate faster navigation in heavy traffic.
- Created a feature allowing users to request emergency help during accidents or critical situations, improving safety.
- Integrated real-time traffic congestion updates to assist users in planning efficient travel routes.
